### **PROCARE AMBULANCE OF MARYLAND, INC. ADDS NEWEST TECHNOLOGY OF BARIATRIC STRETCHER SYSTEMS TO ITS FLEET**

--Tool Allows Patients Weighing Up to 1600 Pounds to be Transported Safely and Comfortably--

**BALTIMORE, MD – April 24, 2013** – Procure Ambulance of Maryland, Inc., a full-service commercial ambulance and wheelchair van transportation company, is pleased to announce the newest additions to its fleet – the 2012 Stryker MX Pro Bariatric Transport System with RX Fabrications Winch and Ramp System and the 2012 Ford F-350 McCoy Miller Ambulance. Both items are used to serve overweight patients.

Procure has been serving the bariatric population since 2005 and made the decision to purchase the newest technology in bariatric systems in order to cater to those with a wider girth and those who are severely overweight, as well as to prevent injuries to providers. Arriving at a facility with the proper equipment and staffing saves transport time and minimizes delays.

The 2012 Stryker MX Pro Bariatric Transport System with RX Fabrications Winch and Ramp System has a width of 29 inches and delivers lateral stability for greater patient comfort. A lift helps move patients safely out of the bed and onto the stretcher.

“One of my goals as President and CEO of Procure is to invest in the best resources for the benefit of my patients, clients and staff. Safety is our priority and we believe that this bariatric system provides the safest and most comfortable transportation option on the market today for our bariatric patients,” states Debbie Ailiff, President and CEO of Procure.

Procure purchased a 2012 Ford F-350 McCoy Miller Ambulance specially fitted to accommodate the new bariatric system and is designed to handle patients weighing up to 1600 pounds.

Since August of 2012, over 60 bariatric patients have already made use of the stretcher.
